

Vision for Music

Intent

Our intention is to increase children's experiences of different types of music which expose our children to a wide range of musicians and cultures. Our aim is to provide a high – quality music education in the early years up to Year 6. It should provide our children with knowledge and understanding of music that they will encounter their whole lives.

Implementation

We have a range of peripatetic teacher and our children have good exposure to different music types in assemblies each week. Our music scheme 'Sing Up' provides engaging and varied lessons for all year groups, with the aim to develop musical skills and understanding of both children and teachers.

Impact

The children are encouraged to explore their interests and be confident in expressing themselves through music. We also hope for them to experience the wider learning and both mental and physical health benefits of singing and creating music.
